BETHEL FELLOWSHIP, INC.
TECHNICAL AND LPFM PRECLUSION STATEMENT

NEW TRANSLATOR – PHILPOT, KY FACID 145264

FCC FORM 349

This Technical Statement is in support of an amendment to an FCC form 349 Auction 83 Short Form Application BNPFT-20030313AYQ filed by Bethel Fellowship, Inc. (“BFI”) for a new FM translator station to serve Philpot, KY. This amendment specifies the technical parameters different than those originally requested; a new location, height above average terrain and effective radiated power on adjacent channel 252-D at Philpot, KY.

PRIMARY STATION:

The proposed translator facility will rebroadcast station WBFI (FM) FACID 4989, McDaniel, KY, co-owned by BFI. The signal of WBFI (FM) at the proposed location is sufficient to rebroadcast the station on the proposed translator facility.

TECHNICAL PARAMETERS:

The technical parameters specified in Section III-A “Tech Box” are the modified to a new location, effective radiated power and height above average terrain on an adjacent channel. In order to clear the Mutual Exclusive situation with application BNPFT-20030312BAB filed by Hancock Communications which also specified operation on Channel 250-D, a move from the originally requested Channel 250-D to second-adjacent channel 252-D is being made. As the proposed 60dBu (50,50) contour overlaps the original 60dBu (50,50) contour by 17.8% and the requested channel change is +/-3 from the originally proposed operation, this instant request qualifies as a minor change application.

LPFM CONSIDERATION:

The proposed facility is located in rural Daviess County, KY, which is not a part of any Ranked Arbitron Market, nor within 39km of the LPFM Grid for any Spectrum Limited Market. As such no further LPFM preclusion data is being presented.
