

EXHIBIT 32
FCC Form 301

Section 307(b) Study
KUQL(FM), Relocation to Ethan, SD

January 2009

Station KUQL(FM), Channel 252C1, Wessington Springs, SD, is licensed to Saga Communications of South Dakota, LLC ("Saga"). This application proposes to change the community of license for KUQL(FM) from Wessington Springs, to Ethan, SD. This proposal would result in a preferential arrangement of allotments or assignments under 47 U.S.C. §307(b). The reallocation of KUQL's community of license to Ethan would unquestionably result in a preferential arrangement of allotments since KUQL would provide a **first local service** to a licensable community and this application would be preferred under Priority 3 as outlined in *Revision of FM Assignment Policies and Procedures*, 10 FCC 2d 88 (1982). Elsewhere in this application are set forth the factors are required to respond to Item 18 of FCC form 301.
