Dear Applicant:

This letter is in reference to the above-captioned minor change applications to modify antenna location, height, and effective radiated power.

Pursuant to 47 C.F.R. § 17.4(a), any proposed construction of a new antenna structure or proposed alteration of an existing antenna structure that requires notification to the Federal Aviation Administration (FAA) requires registration with the Commission prior to the proposed construction or alteration. Our records indicate that the proposed antenna structure has not been registered with the Commission. FCC antenna structure registration may be accomplished electronically via the internet at <http://www.fcc.gov/wtb/antenna/>.

Please note that FAA approval is necessary in order to obtain FCC antenna structure registration. Following FCC registration of the antenna structure, a curative amendment to the application, which includes the antenna structure registration number, must be submitted to the Commission so that processing of your application may be completed. If the antenna structure cannot be registered within 30 days of the date of this letter, the applicant must notify the Audio Division, in writing, concerning the delay.

Further action on the subject application will be withheld for a period of 30 days from the date of this letter to provide an opportunity to respond. Failure to respond within this time period will result in the dismissal of the application pursuant to 47 C.F.R. § 73.3568(a) (1). Please note that any amendment must be submitted in the same manner as the original application.

Sincerely,

A handwritten signature in black ink, appearing to read "Rodolfo F. Bonacci". The signature is fluid and cursive, with a prominent initial "R" and a long, sweeping underline.

Rodolfo F. Bonacci
