## COMPREHENSIVE TECHNICAL EXHIBIT

**Application for Construction Permit**  
**W35CS, Ocean City, MD**  
**FCC File Number BLTTL-20080818AAJ**  
**EICB-TV East, LLC**

**Application for Flashcut of Licensed Facility.** In addition to a request for flashcut of analog channel 35 to permit digital operation, the within filing seeks a change of location, ERP and antenna pattern. Its 51 dBu F50,90 service contour entirely contains the 74 dBu F50,50 contour of the underlying licensed facility; the same community is served together with additional population.

**Interference Analysis.** The following is submitted as an OET 69 Longley-Rice study exhibit for the above-captioned application as performed by the Techware, Inc. FCC interference analysis program on a Sun Blade computer. The study reveals that the within application is in compliance with all applicable portions of §74.793.
