

J.B. SALAZAR  
TL K47IJ - Uvalde, TX - Fac ID 67305

EXHIBIT 6  
Engineering Statement

The applicant is presently authorized, under File No. BPTTL-20011009AAD, to construct the reference station near Uvalde, Texas. It is now proposed to relocate the facility to a site near Knippa, Texas, at the same time increasing the effective radiated power and changing the antenna system. The attached Exhibit 6A indicates the degree of overlap between the authorized and proposed 74 dBu service areas.

A review of all available records (please see attached Exhibit 6B) indicates that this proposal might cause interference to existing stations. In this instance, analyses per O.E.T. Bulletin No. 69 indicate that population loss to any of these would not exceed 0.5% and appropriate waivers are requested. Particular attention is directed to the fact that the first station of the study, K69FC, is the previous call sign of the applicant.
