

## **Exhibit 43**

WTAP-DT, Channel 49, Parkersburg, WV

### **Environmental/RFR**

The proposed facility is categorically excluded from environmental processing as it does not meet any of the criteria in Section 1.1306 of the Commission's rules.

The total ground level radiation from this antenna is much less than 5% of the MPE for public exposure and will effect a reduction in radiation from the presently authorized facility due to the change from circular polarization to horizontal polarization.

Workers on the tower structure will be protected via power reductions by WTAP-DT, as necessary, and WTAP-DT will cooperate with other users to make such power reductions as necessary.

The site is located in a rural area and is fenced to limit unauthorized access. All appropriate warning signage is in-place.
