Ch7 has not been broadcasting in Ruidoso for about a week. When will it be fixed? I understand from your receptionist that you have turned it off. Why would the FCC make you turn this off? What is going to happen the signal in our area. Please let me know if I can contact the FCC to get our signal back.

I receive your broadcast digital signal 7.1 off Buck Mountain near Ruidoso, NM. I understand that you have been off the air because of issues with the FCC and Mexican government, even though mountain ranges block any signals from reaching that country. I'm writing to support your efforts to get back on the air as soon as possible. KOAT provides valuable programming that we in southern NM depend on. We look forward to the speedy return of our KOAT signal. Thank you.

Your translator on Buck Mountain outside of Ruidoso is apparently not working. We have been without a KOAT signal for several days. I received a call from one of your engineers, he was very nice to explain that you had to turn it off because of an interference issue with Mexico and that you are trying to get the FCC to allow you to broadcast on another channel. Please add my name to your list of very concerned viewers. We need KOAT for our news and weather.

Thanks
