

Exhibit 7

The purpose of this exhibit is to explain the difference between the antenna model number granted and the antenna model constructed in this application. WMCF-DT changed it's granted antenna model with one having a different model number.

Specifically, the ERI ALT20H3-HSOX-46 requested and granted was substituted with an ERI model number ATW202H3-HSOX-46. The "ALT" designation in the antenna model number is a typographically incorrect designation for what should have been the "ATL" prefix to the model number. However, the manufacturer has chosen to eliminate the "ATL" prefix altogether and now uses the "ATW" prefix for that same product.

There are no mechanical differences and there is no change in electrical characteristics or height of the center of radiation.
