

## EXHIBIT 12

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules.

Attached at exhibit 13 are a spacing study and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but four other FM facilities. The attached maps demonstrate that there is no prohibited contour overlap between these four facilities and the instant proposed FM translator facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The four facilities that have been included on the attached maps are: WSJY, 107.3, Fort Atkinson, WI (54 dBu contour to proposed 34 dBu interference contour); WVCY-FM, 107.7, Milwaukee, WI (54 dBu contour to proposed 94 dBu interference contour); WGCI-FM, 107.5, Chicago, IL (54 dBu contour to prop. 48 dBu int. contour); and WNRG-FM, 106.9, Brookfield, WI (60 dBu contour to proposed 100 dBu interference contour).

New 107.3 Franklin, WI 74.1204(d) Narrative and its related exhibits are included to show allowable overlap under Section 74.1204(d) with this proposal's 94 interference contour and the 54 dBu coverage contour of WVCY-FM, Milwaukee, WI. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
