

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of FOX TELEVISION STATIONS, INC., licensee of WGHP-DT, Channel 35 in High Point, North Carolina, in support of its Application for Construction Permit to operate a post-transition auxiliary facility on Channel 8, its allotment channel.

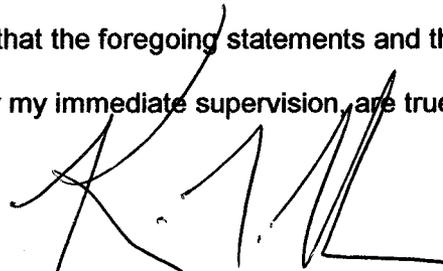

It is proposed to mount a Dielectric directional antenna at the 272-meter level of an existing 383-meter tower. Exhibit B provides antenna azimuth and elevation pattern data, and proposed operating parameters are tabulated in Exhibit C. Exhibit D is a map upon which the predicted service contours of the WGHP-DT allotment facility and the proposed auxiliary facility are plotted. As shown, the auxiliary's 36 dBu contour is completely contained within that of the allotment facility assigned to WGHP-DT in Appendix B of the Commission's DTV Table of Allotments. As a result, and since this proposal is for an auxiliary facility, an interference study is not provided. A power density calculation appears in Exhibit E.

It is not expected that the proposed facility would cause objectionable interference to any other broadcast or non-broadcast station authorized to operate at or near the WGHP-DT site. However, if such should occur, the owner of this station recognizes its obligation to take whatever corrective actions are necessary.

Since no change in overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued Antenna Structure Registration Number 1000751 to this tower.

EXHIBIT A

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

KEVIN T. FISHER
