RE: WWEO DC

February 2, 2012

Sirs;

World Evangelism Outreach, Licensee of Station WWEO-LP, is requesting a grant from the FCC to facilitate their conversion to digital. Prior to their filing two NEW applications have been submitted for digital service within the contour of the current analog station, to NEW, BNPDTL-20090825BWW, Ch. 24, Panama City, FL and NEW, BNPDTL-20090825AVR, Ch. 24, Panama City, FL. Even though these applications were accepted by the FCC, WWEO-DC's proposed digital signal contour will cause just as much interference to these new applications as the current analog contour of WWEO-CA

World Evangelism Outreach will use a Full Service mask filter to ensure no harmful interference will be caused by WWEO-DC to adjacent channels.

WWEO-CA's primary tower has a FCC Registration number as well as an FAA study number. FCC registration 1234677, FAA Study Number 02-ASO-3264-OE

World Evangelism Outreach prays that the commission will consider this as a viable solution for station WWEO-DC and that the commission will approve, as soon as possible, the application BDFCDTA-20111130MXY.

Respectfully,

Joseph Holland  
Consulting Engineer
