Dear Applicant:

This letter refers to the above-captioned minor change application to modify the antenna location, effective radiated power, antenna height, and directional antenna.

An engineering study has revealed a discrepancy with the tower location proposed in the application compared to that on the tower registration record. The application proposes to use a tower located at 34° 36' 42" N.L., 83° 58' 04" W.L. (NAD 27). However, the tower registration record (#1222677) specifies the coordinates 34° 36' 43" N.L., 83° 58' 04" W.L. (NAD 27). This discrepancy must be eliminated. Therefore, if the coordinates are 34° 36' 42" N.L., 83° 58' 04" W.L., the applicant must amend the tower registration record. If the coordinates are actually 34° 36' 43" N.L., 83° 58' 04" W.L., the applicant must amend all pertinent parts of the application to indicate the correct location.

Further action on the subject application will be withheld for a period of thirty days from the date of this letter to provide Tugart opportunity to respond. Failure to correct all tender and acceptance defects within the thirty days from the date of this letter will result in dismissal of the application with no further opportunity for corrective amendment pursuant to 47 C.F.R. § 73.3564. Please note, any amendment must be submitted in the same manner as the original application.

Sincerely,

*for* Rodolfo F. Bonacci
