

Exhibit 13-F Narrative
Section 74.1233(a)(1) Common Overlap
Request for Mattoon Waiver

Frank G. McCoy (“McCoy”), licensee of FM translator W223CG, Facility ID No. 156555, Channel 277D¹, Waukegan, Illinois, hereby respectfully requests the Commission waive section 73.1233(a)(1), requiring overlap between the present and proposed FCC F(50,50) 60 dB μ contours of the translator for grant of a minor change application.

In accordance with the previously established requirements for the grant of a Mattoon Waiver¹, the Commission has previously waived Section 74.1223(a)(1) where an applicant has demonstrated that it does not have a history of filing “serial” minor modification applications, the proposed facility is mutually exclusive to its licensed facility and the translator will rebroadcast an AM station as an AM fill-in translator. McCoy has no history of filing "serial" minor modification applications.

The W223CG facility has not been "hopped" and is operating from its original licensed transmitter site. The proposed W223CG would rebroadcast AM station WNOV(AM), Facility ID No. 36069, 860 kHz, Milwaukee, Wisconsin, as an AM fill-in translator. The proposed W223CG facility is mutually exclusive to the W223CG licensed facility. The attached map demonstrates that the current W223CG FCC F(50,10) 40 dB μ interfering contour does overlap with the proposed W223CG FCC F(50,50) 60 dB μ contour. Both facilities specify operation on the same frequency, Channel 277D (103.3 MHz). The

¹ *An FCC Form 350 is pending for W277CV on Channel 277D*

² *John Garziglia, Esq., 26 FCC Rcd 12685 (2011) (“Garziglia”)*

two facilities are mutually exclusive. Therefore it is believed this proposed modification is eligible for a waiver of Section 74.1233(a)(1) of the Commission's rules.
