

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CAPSTAR TX LIMITED PARTNERSHIP

This statement and the attached figures were prepared on behalf of Capstar TX Limited Partnership ("CTLP"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CTLP proposes to modify the facilities of WDCG(FM) Durham NC. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controller Stations Studied

Call Sign	City	State	Freq	Status
WDCG(AM)	Durham	NC	105.1	Pro
WRSN(FM)	Burlington	NC	93.9	LIC
WMAG(FM)	High Point	NC	99.5	LIC
WVBZ(FM)	High Point	NC	100.3	LIC
WTRG(FM)	Rocky Mount	NC	100.7	LIC
WRDU(FM)	Wilson	NC	106.1	LIC
WDUR(AM)	Durham	NC	1490	LIC

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules¹.

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of WDCG(FM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form two "radio market" for analysis under the Commission's rules.

Radio Market 1 is defined by the mutually overlapping principal community contours of WDCG(FM), WTRG(FM), WRDU(FM), WRSN(FM), and WDUR(AM). The predicted principal community contours of these stations (4FM, 1AM) are shown in *Figure 1A*.

Radio Market 2 is defined by the mutually overlapping principal community contours of WDCG(FM), WRSN(FM), WMAG(FM), and WVBZ(FM). The predicted principal community contours of these stations (4 FM) are shown in *Figure 1B*.

¹ See 47 C.F.R. § 73.3555.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or controlled stations.

In the "radio markets" studied herein, there are at least 17 radio stations, including the subject co-owned stations that overlap or intersect with the defined "radio market." *Figure 2a and 2b* is the tabulation of some of the radio stations identified in the "radio market".

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Troy G. Langham
FCC Engineering Specialist
Clear Channel Broadcasting Licenses, Inc.
