

### Statement of Use of Station for Assisting Educational Program

The American Institute for Jewish Education exists in a town with a large scholarly community based around the largest Post Graduate Rabbinic Seminary in the USA. A need has always been present to provide programming for this and the wider populace surrounding this community. This would include educational topics in areas of Jewish education including Bible-Torah study, Talmud, Mishnah, Prophets, Writings, Jewish Law, Midrash, ethics mussar, Kabbalah-meta-physics, and all areas, including women's issues, minority issues, family counseling, children's issues, handicapped, and psychological issues using the talent from our scholarly community. Also entertainment i.e. music, news, weather, community issues, and all relevant topics can be presented to the entire local area. There is currently no radio station addressing this large community.
