

Technical Statement
Application for Construction Permit
W202AR 88.3 mHz. Facility ID 60893 Newburgh, NY
November, 2011

The purpose of this application is to change the primary station, rotate the directional transmit antenna and change power level. The primary station will change to WLJP and be a fill-in translator. This proposal is conditioned on the build out of WLJP Construction Permit BMPED-20110509ACQ. The translator is designed to fill in an area of co-channel interference caused to the primary station by radio broadcasts from the US Military Academy at West Point.
