

## WDPW Directional Antenna Orientation

I, Thomas P. Therrien, hereby state that I have measured the magnetic azimuth of the directional antenna for WDPW, Belding, Michigan and that it is installed at a magnetic azimuth 321 degrees measured by compass and adjusted by the declination of 5 degrees 38 seconds West as computed for the Latitude of 43 degrees 5 minutes 12 seconds North and Longitude of 85 degrees 18 minutes 59 seconds West on August 14, 2008 by the National Geophysical Data Center. The magnetic azimuth adjusted to a true azimuth is 315 degrees.
