

Exhibit 32.1

Section 307(b) Study

This application proposes to change the community of license for KUQL(FM) Channel 252C1, from Wessington Springs, SD to Ethan, SD. The following factors are required to respond to Item 18 of FCC form 301:

(1) If new technical facilities are proposed, the area and population within the proposed 70 dbμ and 60 dbμ contours of the station.

New technical facilities are not being proposed. This Form 301-FM is being filed solely to change the communities of license with no changes to the physical operating plant.

(2) The number of stations licensed to the proposed new community of license.

There are presently no stations licensed to the new community of Ethan, SD.

There are presently two (2) FM broadcast stations licensed to the former community of Wessington Springs, SD.

KUQL(FM) (to be relicensed to Ethan)
KJRV(FM)

(3) The number of stations providing protected service to the proposed community of license.

The communities of Ethan, SD and Wessington Springs, SD are considered fully served with no less than five (5) services as noted in ***Exhibit 32.2***. A complete listing of all services will be supplied upon request.

(4) The population (according to the latest Census data) of the proposed community of license.

According to the 2000 Census, the population of Ethan, SD is 330.

(5) Where relevant to establish the precondition of a licensable community, a description of the civic, cultural, religious, social and commercial attributes of the proposed community of license.

Ethan, SD is an existing town according to the 2000 Census. Showings establishing Ethan, SD as a licensable community have been included in this exhibit.

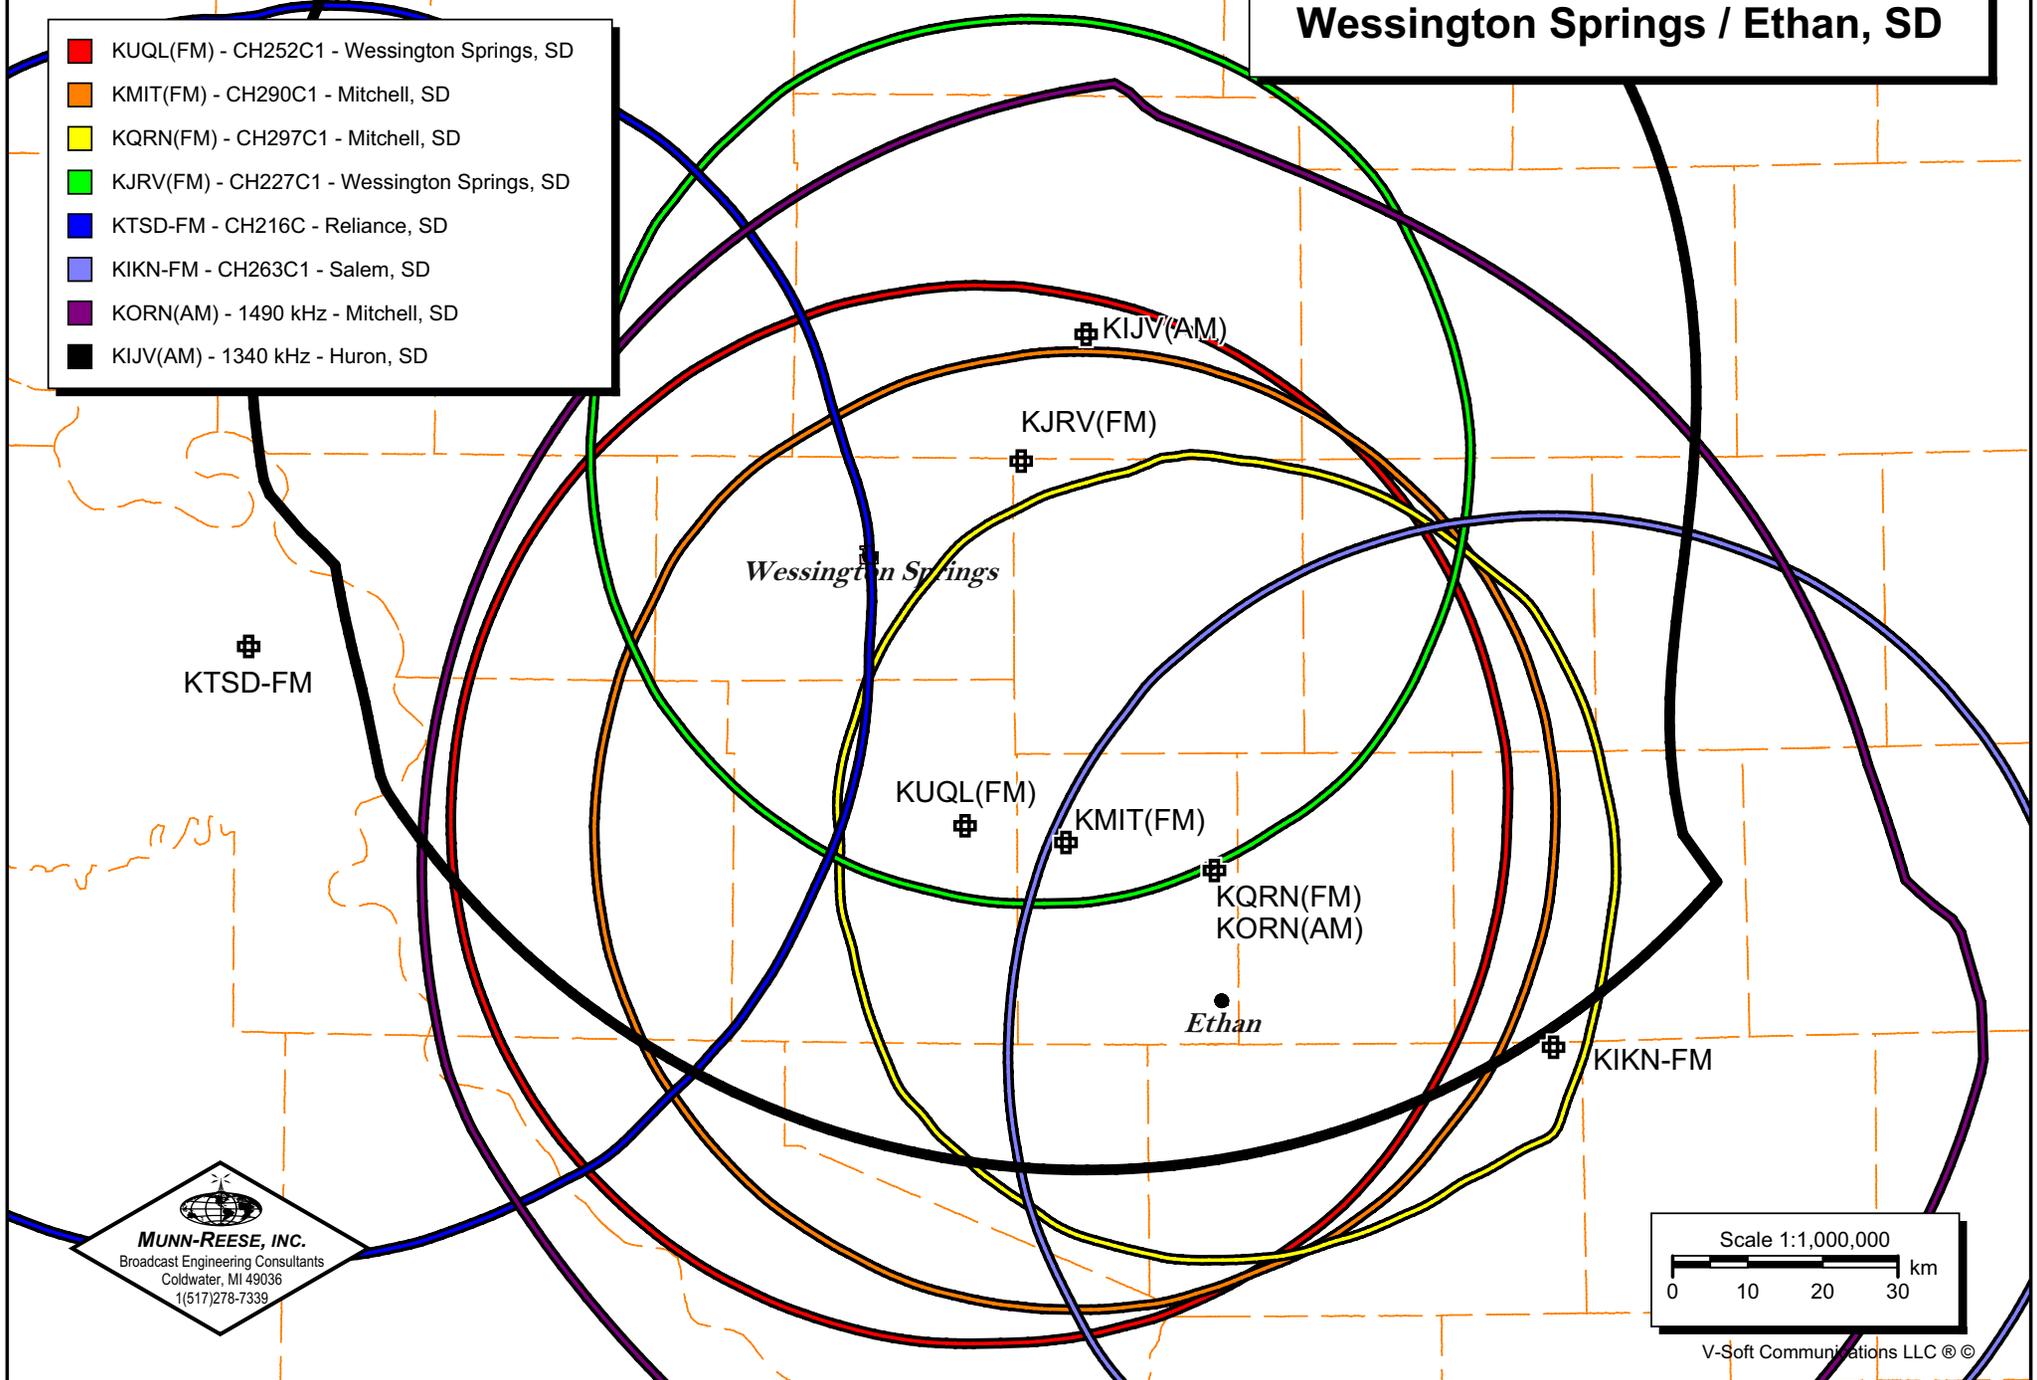

(6) Any other information deemed relevant.

No other information is deemed relevant at this time.

All Contours shown represent 60 dBu service for FM and 0.5 mV/m (Daytime) service for AM.
