**AN AMENDMENT TO A PENDING APPLICATION**  
**KUNU-LP**  
**VICTORIA, TX**

**Background**

Saga Broadcasting, LLC (Saga) is the licensee of low power television KUNU-LP, CH21, (BLTT-19990728JB, Facility ID. 31516) at Victoria, TX. Saga in a recently filed application for a minor change in licensed facility (BPTTL-20040424ACN) proposed to increase the ERP of this facility from 1 kW to 25 kW and change to a different omni-directional antenna that would accommodate co-owned low power TV facilities KXTS-LP and KVTX-LP. Saga would also relocate the antenna to the top of the (registered) tower that is presently being used and place it in such a manner so as not to increase the overall height of that structure. When this application was filed online the RCAGL (Height of the Radiation Center Above Ground Level) was entered incorrectly. This application amends that application so that the RCAGL is corrected to 146.4m. All else remains the same.

**B****Certification**

I hereby certify that the foregoing report or statement was prepared by me but may include work performed by others under my supervision or direction. The statements of fact contained therein are believed to be true and correct based on personal knowledge, information and belief unless otherwise stated; with respect to facts not known of my own personal knowledge, I believe them to be true and correct based on their origin from sources known to me to be generally reliable and accurate. I have prepared this document with due care and in accordance with applicable standards of professional practice.
