

RFR measurements Robbins Mountain 3/14/2008

Using Narda model 8718 meter and A8742D probe sn 01109

13:50 to 14:15 with W234BD translator on, highest reading inside the fence 19.9% of standard, outside the fence 9.4%. In both cases the highest reading was directly in front of the WGLY transmit antenna.

14:22 to 14:35 with W234BD off, highest reading inside the fence 19.4%, outside the fence, 8.0%.

Note: The highest reading appeared to be from a reflection from a building, the next highest reading, away from that building was 14.4%,
