

### **Request for Special Temporary Authority**

WLII/WSUR License Partnership, G.P., licensee of WUKQ-FM1, Facility ID 127832, Ponce, Puerto Rico, (the "Station") respectfully requests Special Temporary Authority ("STA") to operate at reduced power while the Station works to resolve complaints of interference from AT&T related to the Station's broadcast facility. Specifically, the Station seeks to operate at reduced power in order to allow it to work with the transmitter manufacturer to identify the source of any complained-of interference. Although field measurements from both Station engineers and AT&T indicate that the Station is complying with the applicable requirements, the Station is working diligently with AT&T in order to amicably resolve any complained-of interference. Accordingly, grant of STA is in the public interest as it will mitigate any complained-of interference while the parties work to reach a mutually satisfactory resolution. The Station will alert the Staff when the remaining technical issues are resolved.
