## Exhibit 6

### Engineering Statement in support of Application BLTTV2048 Channel 60, Rollins, etc., MT, Blacktail TV Tax District

#### **ANTENNA HEIGHT**

The antenna structure is a 20 foot mast mounted on top of the transmitter building. It therefore does not exceed the height limit requiring FAA clearance. This information should clarify the height problem noted in earlier minor change applications.

#### **BACKGROUND**

Blacktail TV Tax District is a governmental agency that holds the license for K60AL. Applicant is filing a displacement application for K60AL since this station is not located within the core channel group. Blacktail TV Tax District is making a channel change to 32, no offset, which is within the core channel group. In addition to the channel change, the applicant is changing the site location about 10 km to the southwest, changing the antenna and orientation, and there is an ERP increase.

There is 74 dBu contour overlap between the licensed station and the proposed displacement application facilities on channel 32N. The sum total of the changes will be to have its facilities better serve the communities receiving its signal.
