

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), a licensee subsidiary of Clear Channel Communications, Inc. ("CCC"). CCBL proposes to modify the facilities of KZPR(FM), Minot, ND. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership, time brokerage or joint sales.¹

Table 1: Proposed Commonly Owned, Brokered or Jointly-Sold Stations
Studied and Associated Arbitron Metro² Information

Calls	Fac, ID	Band	Community	State	Geographic Arbitron Market	Declared Arbitron Market
KXMR	2211	AM	BISMARCK	ND	Bismarck, ND	Bismarck, ND
KRRZ	9679	AM	MINOT	ND	non-metro	non-metro
KCJB	55681	AM	MINOT	ND	non-metro	non-metro
KZPR	9675	FM	MINOT	ND	non-metro	non-metro
KIZZ	15968	FM	MINOT	ND	non-metro	non-metro
KMXA-FM	34996	FM	MINOT	ND	non-metro	non-metro
KYYX	55680	FM	MINOT	ND	non-metro	non-metro

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations) an ownership study has been prepared in accordance with the Federal Communications Commission's local radio ownership rule.³ The station to be modified is not located within or designated as home to any Arbitron Metro.⁴

CCC does not have an attributable interest in any other station with a principal community contour that overlaps or intersects the principal community contour of KZPR(FM) as proposed.

Interim Contour-Overlap Analysis

Because the principal community contour of the station to be modified intersects the principal community contour of stations under common ownership or attribution whose communities of license are located outside any Arbitron Metro, and the subject station is itself located outside any Arbitron Metro, an interim contour-overlap analysis is set forth in this statement.

¹ None of the following stations are attributable by virtue of a time brokerage agreement or joint sales agreement.

² Arbitron data presented herein is obtained from BIA's "Media Access Pro."

³ See 47 C.F.R. § 73.3555(a).

⁴ A station is considered to be "located in an Arbitron Metro" if the station's community of license is located within the boundaries of that Metro, or, the station is listed as "Home" to that Metro by BIA.

Interim Contour-Based Radio Markets

A "radio market" under the interim contour-overlap method is the area encompassed by the mutually overlapping principal community contours of the stations under common-ownership or attribution. Here, such mutually overlapping contours form one "radio market" for interim contour-overlap analysis under the Commission's rules.

The "radio market" is defined by the mutually overlapping principal community contours of KZPR (FM) (APP) (this instant application), KXMR(AM), KPRZ(AM), KCJB(AM), KIZZ(FM), KMXA-FM, and KYYZ(FM). The predicted principal community contours of these stations (3 AM / 4 FM), as well as other stations whose principal community contours overlap this combination, are shown in *Figure 1*. *Figure 2* is the tabulation of some of the radio stations identified in the "radio market."

Count of Stations in Defined Markets

The number of radio stations in a contour-overlap "radio market" is determined by counting the operating stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject commonly owned or attributed stations, excluding any stations whose transmitter sites are further than 92 kilometers from the perimeter of mutual overlap, and excluding any commonly owned or attributable stations that do not serve to define the market.

In the interim contour-overlap "radio market" studied herein, there are at least 15 radio stations, including the subject co-owned stations, which overlap or intersect with the defined "radio market." *Figure 2* is the tabulation of some of the radio stations identified in the contour-overlap "radio market".

Only known licensed, operating radio stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 45 degrees of azimuth.

Conclusions

In the interim contour-overlap "radio market" studied herein, there are at least 15 stations, including the commonly-owned 3-AM / 4-FM stations.

This proposal is not in compliance with the most recent version of the local radio ownership rules. However, the existing KZPR(FM) licensed facility was also not in compliance with these rules. This proposal maintains the *status quo*. Because this modification would not create a "new violation" of the ownership rules, this existing combination of radio stations qualifies for grandfathering. See *Note 4 to 47 C.F.R. Section 73.3555* (minor modification applications are subject to ownership restrictions only if implementing a change in an FM radio station's community of license or if new or increased concentration of ownership among commonly-

owned media would be created); accord 2002 Biennial Regulatory Review—Review of the Commission's Broadcast Ownership Rules and Other Rules Adopted Pursuant to Section 202 of the Telecommunications Act of 1996, 18 FCC Rcd 13,620 at fn. 1033 (2003) (modifications of facilities in a grandfathered combination are prohibited if the proposed modification would create a new violation of the ownership rules).

Respectfully submitted,

Troy G. Langham
FCC Engineering Supervisor
December 16, 2004
