

TECHNICAL STATEMENT
NEW(FM) TRANSLATOR
FCC FORM 349
MILWAUKEE, WISCONSIN, CH. 262D
MARY MEDICUS
AUGUST 2013

This FCC “Long Form” 349 application is being submitted in response to DA 13-1675 released July 31st, 2013 regarding Non-Mutually exclusive Tech Box proposals, or “Singleton” applications for new Auction 83 FM translator stations. This application is response to an original application filed by Mary Medicus, BNPFT-20030317HNT, facility ID 156567, for a new FM translator for Milwaukee, WI on channel 262D. This application is listed in “Attachment A” of DA 13-1675, report No. AUC-03-83-E.

The applicant does not seek to make any technical changes to the current pending “Tech Box” application, thus no new LPFM preclusion study is required since the applicant is relying on the previously filed LPFM preclusion study.

This application proposes service on channel 262D (100.3 Mhz) from an existing registered tower, 1039847, located at the NAD 27 coordinates of N 43° 09' 18", W 87° 58' 57". The existing tower has an overall height of 78.9 meters. The proposed antenna will be a Scala Model CL-H, with horizontal polarization, mounted at the 68 meters above ground center of radiation, and 285 meters height above mean sea level. An effective radiated power of 0.012 kilowatts (12 watts).

Figure 1 is a detailed channel interference study conducted at the proposed site. As can be seen, there will not be any outgoing prohibited overlap with any other stations on Co-channel or pertinent adjacent channels, with the exception of 2nd adjacent channel station WKV-FM Racine, WI , operating on channel 264B, facility ID 53975.

The proposed operation on 262D is located within the protected 60 dB μ contour of 2nd adjacent channel of WKKV-FM (ch. 264B). Figure 2 shows that WKKV-FM produces a field strength of 67.9 dB μ at the proposed site. Therefore, the respective worst case predicted interfering contour F(50-10) generated by the proposed translator on channel 262D is an additional 40 dB μ or 107.9 dB μ .

Figure 3 shows the coverage area for the "worse case" 107.9 dB μ interference contour F(50-10) and shows that there is no population in the area of interference. The 107.9 dB μ interference contour would only extend 0.0285 kilometers (28.5 meters). Since the antenna will be mounted 68 meters above the ground level, the interference contour will not reach the ground. Thus, there will be no actual interference caused to WKKV-FM. Figure 4 is a Topographic Map showing the area around the proposed site. Figure 5 is a Satellite view map of the area located around the proposed site. The applicant, Mary Medicus, respectfully requests a waiver of C.F.R. 74.1204(d) of the Commission's rules based on the fact that there is no population within the area of predicted interference. There are no homes nearby the proposed existing tower site, which is a privately owned with private access. Should any unforeseen actual interference be caused, the licensee will immediately cease broadcasting with new translator at Milwaukee, WI until such interference can be eliminated.

Figure 6 is a tabulation for 36 standard radials (every 10 degrees), average heights above average terrain for each radial and the distances to pertinent contours for the proposed operation on channel 262D.

Figure 7 is the directional antenna data for the proposed antenna.

This application will not overlap with any other proposed FM translator applications submitted in "Auction 83".

It was determined that this form 349 FM translator application will comply with all of the technical requirements under part C.F.R. 74 of the Commission's rules and regulation.

Terrain database is NGDC 30 SEC , R= 73.215 qualifying spacings or FCC minimum Spacings in KM, M= Margin in KM
 In & Out distances between contours are shown at closest points. Reference zone= East Zone, Co to 3rd adjacent.
 All separation margins (if shown) include rounding
 Ant Column: (D= DA Standard, Z= DA 73.215, N= Not DA 73.215, __= Omni), Polarization (C,H,V,E), Beamtilt(Y,N,X)
 **affixed to 'IN' or 'OUT' values = site inside protected contour.

* TRANSLATOR APPLICATION ASSOCIATED WITH THIS LONG FORM 301 APPLICATION.

** No actual interference will be caused to WKKV-FM since the 107.9 DBU Interference Contour will cover any population. See the Technical Statement for more details.
