

**American Educational Broadcasting, Inc.**

KQNV, Fallon, NV

Modification of Construction Permit BPED-20170606AAT

**EXHIBIT 24**

September 2018

### **Environment Impact & RFR Compliance Statement**

KQNV will be located at an established communications site that is in compliance with all environmental impact requirements.

KQNV will operate with 3.2 kW ERP (H, non-DA) with an antenna COR AGL height of 55 meters. For a worst case estimation at 2 meters above ground level the RFR is no more than 19.0% of the general population/uncontrolled MPE limit. There are no other broadcast facilities at the site.

RFR hazard warning signs will be posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
