

W268CO (WINT) EXHIBIT 10

CP SPECIAL OPERATING CONDITIONS:

WINT was already operating under a STA non-directional @ 125 Watts using indirect power method.

No additional STA was required.

WINT base impedance did not change in excess of 2 ohms / 4%, therefore no form 302-AM was required to be filed.

The Licensee will coordinate with other users on the site and reduce power or cease operations as necessary to protect persons having access to the site, tower, or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
