EXHIBIT A

One -Step Change of Community of License
with Channel Change in Another Community

This instant application seeks to change the community of license of KZCC to Channel 238C3 at Trinidad, California. In order to make the change, it is necessary to substitute Channel 249C3 for Channel 236C3 at McKinleyville, California, based on procedures as outlined in *Revision of Procedures, 21 FCC Rcd 14212 (2006)*. ABC herein reviews the proposed change of channel to show why it is in compliance with the Commission's rules/procedures.

As indicated on Exhibit A1, at the proposed allocation/application site at Trinidad, California, Channel 238C3 meets the Commission's minimum distance separation requirements to all other licensed, applied for, or proposed facilities, pursuant to §73.207, with the exception of the allocation site and proposed application site for Channel 236C3, McKinleyville, California, filed by William W. McCutchen, III ("McCutchen"), the auction winner for Channel 236C3 at McKinleyville, California. As such, ABC respectfully requests that Channel 249C3 be substituted for Channel 236C3 at McKinleyville, California; that McCutchen be directed to amend its application to specify operation on the new channel; and that the Commission issue an Order to Show Cause or other instrument seeking the change of channels at

McKinleyville. As indicated on Exhibit A2, Channel 249C3 meets the Commission's minimum distance separation requirements to all licensed, applied for, or proposed facilities, based on the present Channel 236C3 allocation site at McKinleyville. Exhibit A3 is a clearance study for Channel 249C3 at the site currently specified in BNPH-20070502AFH. Based on the use of the existing allocation site, and the site proposed in the pending McCutchen application, it is assumed that a 70 dBu contour from either site is delivered over McKinleyville, California.

Therefore, ABC requests the following changes at McKinleyville, California:

McKinleyville, California	
Present	Proposed
236C3, 277C3	249C3, 277C3

Based on the foregoing, the proposed substitution of channels at McKinleyville, California complies with the Commission's rules and regulations.
