

Exhibit 2 - Educational Statement

Materials and Applications is a tax-exempt media arts corporation under section 501 (c)(3) of the IRS code. The organization's mission statement declares that it will produce installations twice a year, and host discussions, workshops, performances, and other events centered around the architectural arts. Materials and Applications is an outdoor exhibition space and entry is free. By providing a free, interactive cultural space, we hope to be a driving force in increasing public participation in built environments.

Materials and Applications has held numerous exhibitions, workshops, and events to educate artists, children and the general public about architecture and its applications in our environment.

Materials and Applications seeks to employ the radio station to bridge the gap between the architectural and sonic arts. Listeners would be able to tune-in and hear interviews, lectures, stream live installations and mixes by acclaimed local/international artists. Through an FM broadcast Materials & Applications could reach new communities and further promote art through space, environmental awareness and creativity amongst our changing landscape.
