Comprehensive Technical Exhibit

**Application for License to Cover
KBLM-LP, Facility ID 38561
FCC File Number BPTTL-20020530ACP
Louis Martinez Family Group, LLC**

Antenna installed on adjacent tower. The within application for License to Cover BPTTL-20020530ACP deviates from the above-captioned construction permit in the following manner:

1. The tower on which the facility is constructed is ASR #1018937, located at the following NAD27 coordinates: 33° 57' 41.6" North, 117° 16' 47.2" West with a ground elevation of 940.2 meters AMSL.
2. The tower on which the construction permit was granted is ASR #1012220, located at the following NAD27 coordinates: 33° 57' 44.0" North, 117° 16' 48.0" West with a ground elevation of 935.0 meters AMSL.
3. The distance separating the towers is 77 meters, or 253 feet.
4. The ground elevation difference between the towers is 5.2 meters, or 17 feet; the tower on which the facility is built is located on the higher ground.

Maintenance of correct antenna height AMSL at installation. The change in the installation is that the antenna center of radiation height above ground at the tower on which constructed is reduced by 5.2 meters (17 feet) to compensate for the change in ground elevation, thus leaving the antenna center of radiation at the same height above mean sea level as that contemplated by the construction permit.

Authority for filing and exhibit; certification. This installation is performed under authority of §74.751(b)(3) and (b)(4). Further, this document will be placed in the station records pursuant to §74.751(d). The study and calculations in this application were performed by me and are complete and correct to the best of my knowledge and ability.
