

Interference statement
20091119ACQ

This amendment is filed in response to a letter from The Commission stating proposed interference to W50DD's displacement application to channel 33 serving Peoria, IL (BDISDTT 20060328AAX). A review of the CDBS indicates that 20060328AAX expired on September 1, 2010 and no application for license or extension has been filed for it. That being the case, 20060328AAX should be purged from the database and should not be considered during the processing of this application.
