

## EXHIBIT 11

Included in Exhibit 12 are two PDF's of information. These two PDF's clearly show no prohibited overlap between this proposal and any other FM services. The first PDF is an FM spacing study showing that this proposal is fully spaced even when considering this proposal as a full power Class A FM to all other FM facilities with the exception of three facilities. These three exceptions are then detailed and no prohibited overlap is shown in the second PDF included as Exhibit 12. In addition, one currently operating FM translator, one proposed new FM translator, and one proposed LPFM facility have been detailed and no prohibited overlap has again been shown in the second PDF included as Exhibit 12. These other facilities have been shown because they are closely spaced. The six facilities shown in the second PDF included as Exhibit 12, which is a contour analysis map, are: WCWY, 107.7, Tunkhannock, PA (60 dBu contour to proposed 100 dBu interference contour); WEGH, 107.3, Northumberland, PA (60 dBu contour to prop. 40 dBu int. contour); New-FM Allotment, 107.5, Liberty, PA (60 dBu contour to prop. 54 dBu int. contour); Translator W297AF, 107.3, Scranton, PA (60 dBu contour to prop. 40 dBu int. contour); Proposed Translator, 107.3, Tunkhannock, PA (60 dBu contour to prop. 40 dBu int. contour); and Proposed LPFM, 107.3, Plymouth, PA (60 dBu contour to prop. 40 dBu int. contour). A scale of kilometers was included in the map which was the second PDF included as Exhibit 12, this map was drawn to scale using the rf Software series of computer programs.
