

EXHIBIT 15

Multiple Ownership

Introduction

On December 12, 2006, Clear Channel Communications, Inc. ("CCC"), ultimate parent of the Assignor, filed Form 315 applications requesting FCC consent to transfer control of it from its shareholders to the Stockholders of BT Triple Crown Merger Co., Inc. (the "Merger"). In those applications, the parties noted that CCC licensee subsidiaries hold certain radio and radio-television combinations pursuant to Commission grandfathering rules or temporary waivers that preclude transfer of the combinations to a new owner. To address this, CCC stated its intention to divest of stations in the non-compliant combinations to third party buyers prior to or simultaneously with consummation of the proposed transfer or, if necessary, to assign the necessary number of stations to an insulated trust. By this and seven other concurrently filed Form 314 applications (the "Trust Applications"), the parties seek consent to assign the requisite number of CCC station licenses to a divestiture trust (the "Trust") in order to eliminate the non compliant ownership combinations that would preclude grant of the Merger transaction.

In some grandfathered non compliant markets, CCC has not determined which station or stations to place into the divestiture Trust. For these markets, the Trust Applications include each station in the non compliant combination. By the time the parties to the Merger are ready to close that transaction, CCC will have decided which stations to assign to the Trust, and will put into the Trust no more stations than are allowable under the Commission's radio ownership rules. Thus, the parties respectfully request grant of the instant applications conditioned upon assignment into the Trust of no more than the number of stations allowable under the multiple ownership rules.

Radio Multiple Ownership Showing

Because the Trust Applications do not involve any television duopoly or television radio cross ownership combinations, this showing only pertains to the radio ownership

limitations found in Section 73.3555(a)(1) of the Commission's Rules. This rule provides a tiered approach to determine whether a commonly-owned combination of radio stations complies with the ownership limitations in a particular market.¹ To demonstrate compliance with this rule, the FCC relies upon one of three different methodologies:

Arbitron Only Methodology

This Methodology applies in situations where more than one commonly-owned and/or attributable radio station is "home" to *and* licensed to a community within an Arbitron Metro's boundaries. Using this Methodology, the FCC determines the number of stations in the radio market by counting all commercial and non-commercial stations that are either "home to" the Arbitron Metro and/or are licensed to a city within the Arbitron Metro's boundaries, as listed by BIA in its "FCC Geographic Market" analysis.

Contour-Only Methodology

For combinations involving stations that are licensed to communities outside an Arbitron Metro, the FCC currently applies an interim contour-overlap method. Under this approach, the applicable market is defined by the overlapping principal community contours of the commonly-owned stations. To determine the total number of radio stations in the market, the Commission includes any station whose principal community contour overlaps that of at least one of the commonly-owned stations, with two exceptions. It excludes those stations with transmitter sites farther than 92 kilometers from the perimeter of the common overlap area and/or commonly-owned radio stations that do not overlap the mutual overlap area of the other stations in the combination.

Arbitron-Contour Methodology

In two circumstances, the FCC requires both Arbitron and Contour Methodology Showings: (1) Where one of the commonly-owned stations is licensed to a community

¹ Under this approach, entities under common control may have a cognizable interest in radio broadcast licenses with the following limits: (i) In a radio market with 45 or more full-power, commercial and non-commercial radio stations, up to 8 commercial radio stations, of which not more than 5 are in the same service; (ii) In a radio market with between 30 and 44 stations, up to 7 stations of which not more than 4 are in the same service; (iii) In a radio market with between 15 and 29 stations up to 6 stations, of which not more than 4 are in the same service; (iv) In a radio market with 14 or fewer stations, up to 5 stations, of which not more than 3 are in the same service; provided, however, that no entity may have a cognizable interest in more than 50% of the stations in such market unless the combination of stations comprises not more than one AM and one FM station.

outside of an Arbitron Metro, but is considered “home to” an Arbitron Metro; and (2)

Where a station that is licensed to a community within an Arbitron Metro (regardless of whether the station is home to that Metro) has overlapping principal community contours with at least one other commonly-owned station that is not licensed to a community in an Arbitron Metro.

Table 1 below lists stations for which no ownership showing is required because the station is either the only one being assigned to the Trust in a particular market, or it is in a 1AM/1FM combination.

Table 1. No Radio Ownership Showing Required.

Table 2 below includes all of the radio stations for which an ownership showing is required and summarizes whether the radio station combination(s) to which the station

is a part complies with the ownership rules. Specifically, the Table lists the number of AM and FM stations in the ownership combination included in the Trust Applications (“# of Trust Stations”). Next, the Table indicates the number of stations in the relevant radio market (“# of Market Stations”). The following column, “# of Stations Over Limit,” indicates whether, and to what extent, the combination exceeds the current ownership limits. Finally, the last column, entitled “Showing” indicates the methodology used to determine whether the combination, or combinations, in which the station is involved complies with the rules and the page number of the related Arbitron (“A”) and/or Contour (“C”) Methodology showings.²

² Where Arbitron Methodology has been used to assess whether particular combinations comply with the multiple ownership rules, the Exhibit provides the page number in Attachment A for the relevant BIA FCC Geographic Market printouts obtained from BIA's Media Access Pro v 4.2 containing data updated June 14, 2007.

Contour Methodology maps depicting the markets created by the combination of commonly-owned stations are included in Attachment B. The page following each map contains one or more tables listing those stations whose principal community contours overlap at least one of the commonly-owned station, excluding; (1) those with a transmitter site farther than 92 kilometers from the perimeter of the common overlap area; and/or (2) commonly-owned radio stations that do not overlap the mutual overlap area of the other stations in the combination. On these maps dark blue lines indicate FM stations that are “home” to *and* licensed to communities within an Arbitron Metro’s boundaries. Light blue lines denote FM stations that are not licensed to communities within an Arbitron Metro’s boundaries (these stations may or may not be “home” to an Arbitron) and red lines represent AM stations that are “home” to *and* licensed to communities within an Arbitron Metro’s boundaries. Finally, orange lines show AM stations that are not licensed to communities within an Arbitron Metro’s boundaries (these stations may or may not be “home” to an Arbitron).
