On January 4, 2014, I observed the final installation of the Shively 6025-4/1 DA Log Periodic Directional FM antenna at WKBR tower site in St. George, SC.

I hereby state that the antenna is installed with a directional azimuth of 105 degrees true north bays rotated 43 degrees for bays 1-4 and 255 degrees true north for one bay rotated 43 degrees as specified in the Shively Shop Order #31127-2. The azimuth observed is based on True North. I have prepared this exhibit for WKBR, and declare all information stated to be true to the best of my knowledge and belief.

Respectfully Submitted
