

K18EL, Newberg/Tigard, Oregon (Facility ID No. 35467)  
Request for Special Temporary Authority  
Exhibit 22  
June 2006

On behalf of Meredith Corporation, (the "Licensee"), licensee of the above-referenced low-power television station (the "Station"), and pursuant to Section 73.1635 of the Commission's rules, we hereby respectfully request Special Temporary Authority ("STA") for K18EL to continue to operate with parameters at variance from the Station's authorized facilities (FCC File No. BLTTL-19940506IN).

On May 8, 2006, the Licensee informed the Commission that K18EL had begun temporary operations at reduced power with an emergency antenna.

The Station is currently operating with the following parameters:

Antenna Coordinates:	45-21-17.0 N 122-59-17.0 W
Antenna Type:	Directional
Antenna Make:	Kathrein/Scala
Antenna Model:	K72314
Effective Radiated Power:	7.50 kW
Height of Radiation Center Above Ground:	40 meters
Height of Radiation Center Above Mean Seal Level:	479 meters

A replacement antenna has been ordered and the manufacturer estimates delivery by the third week of June 2006. The Licensee will continue to work diligently to restore normal operations and will inform the Commission as soon as the Station has returned to full-power operations.

Grant of this STA request would serve the public interest by ensuring the continued provision of service to the Station's community of license. In the unlikely event that unacceptable interference is caused, the Licensee is willing to take all reasonable steps to eliminate such prohibited interference, including modifying operating parameters or ceasing operation, if necessary. The Licensee understands that grant of STA does not provide any permanent authority to operate the Station in the manner proposed.
