TECHNICAL EXHIBIT APPLICATION FOR CONSTRUCTION PERMIT

**APPLICATION FOR DISPLACEMENT CONSTRUCTION PERMIT
KSKT-CA, Facility ID 58927, San Marcos, CA
FCC FILE NUMBER BLTTA-20010712AAA
BLUE SKIES BROADCASTING CORPORATION**

Digital Operation with Displacement Relief Sought. KSKT-CA is located only 169 km from cochannel facilities KCAL-TV-Da and KCBS-TV-D. Accordingly, displacement relief is sought to avoid excessive incoming and outgoing interference with respect to these facilities. Digital operation is sought on channel 36.

Location and pattern overlap. The location of the instant application is on the same antenna farm location as the underlying license; the coordinates are shown slightly different to accurately depict the registered tower the facility will be located on. Antenna pattern is rotated, but overlap exists with the underlying license.

Mexican coordination. The proposal is located within 275 km of the US border with Mexico. Although no Mexican cochannel facilities were located within any reasonable distance and none were revealed in any interference study, it is anticipated that it may be necessary to send the application to the Mexican government for review. In that connection, the applicant certifies that no interference was shown to any Mexican television facility in any of the test studies run prior to the filing of the within application.

Supercedes prior digital application. This facility has pending a flashcut application, BDFCDTA-20051020AAP. The within application supercedes that one of which dismissal is requested only upon grant of the within application.
