

## **EXHIBIT 19 Channel 6 protection**

Pursuant to 47 CFR 73.525, WRGB, Schenectady, NY, is considered an affected channel 6 TV station because is less than 193 km from the proposed station on channel 213 in Vergennes, VT.

Using the applicable procedures from 47 CFR 73.525, it can be shown than no objectionable interference will occur to WRGB's protected contour.

The two stations are separated by 190 km. WRBG's 47dBu contour (along bearing 22°) extends 115 km from its transmitter. Using the 22 db U/D ratio for FM channel 213, the proposal's 69 dBu interference contour, along bearing 202° (where Height Above Average Terrain equals 267 meters), extends 12 km from the proposed transmitter location.

There is 63 km of clearance between the two contours.
