

## **EXHIBIT E-1**

Please note that KISU-DT has changed antenna manufacturer since filing the outstanding construction permit (BPEDT-20000501AIF). In the granted permit, KISU-DT specified that an Andrew ALP-32M4 or equivalent type antenna would be used for its DTV operation. The Dielectric equivalent, the TFU-32DSB-B, was chosen. The electrical characteristics of the two antennas are equivalent, and therefore this change has no affect on the approved operation of KISU-DT.
