

EXHIBIT A

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of ARKANSAS 49, INC., licensee of KYPX(TV), Camden, Arkansas, in support of this amendment to its Application for Construction Permit BPCDT-20050224ACE to operate as a DTV facility. This amendment corrects the proposed site coordinates, site elevation, and overall tower height to correspond with the FCC's tower registration database. No change in radiation center above ground or antenna model is specified herein.

Exhibit B is a map upon which the revised service contours are plotted. As shown, the city of license is still completely contained within the proposed 48 dBu service contour. The changes proposed herein do not affect the interference analysis results contained in BPCDT-20050224ACE. In addition, the power density calculation remains unchanged. In all respects, the proposed facility complies with the Commission's Rules

Because no change in the overall height or location of the existing tower is proposed herein, the FAA has not been notified of this application. In addition, the FCC issued an Antenna Structure Registration Number 1037622 to this tower.

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.

JEFFREY S. FISHER
