

Environmental Considerations

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action.

The proposed transmitting antenna will be side-mounted on an existing tower. None of the conditions specified in Section 1.1307(a) of the FCC Rules, concerning actions that may have a significant effect on the environment, are believed to apply.

The proposed transmitting facilities will comply with the FCC guidelines limiting human exposure to radio frequency energy. The maximum power density level at ground level, calculated in accordance with OET Bulletin No. 65 (August 1997), is less than 0.1% of the public exposure guideline applying at UHF Channel 41. Accordingly, the proposed facility is categorically excluded by FCC Rules from having to consider the contributions of other stations at the site.
