Re: Radio Acquisition Corp.  
WMTN(AM), Morristown, TN  
Facility Identification Number: 22338  
File number: BP-20200116AAB

Dear Mr. Perry:

This is in reference to the above-captioned minor change application to correct the tower height and coordinates for station WMTN, Morristown, TN, and your amendment filed on April 23, 2020, in response to our deficiency letter of April 14, 2020. For the reason below, we deny the amendment.

Your amendment does not sufficiently address our finding that the corrected height of 46.6 meters fails the slope test result from the FCC's "TOWAIR" determination utility with respect to Moore-Murrell/Morristown Regional Airport.

If WMTN's tower lacks the results of a completed FAA study indicating a determination of no hazard, its licensee should commission an FAA airspace study as stated in our letter of April 14. The findings of that study may indicate the necessity of further action, including registration in the FCC's Antenna Structure Registration database, as detailed in the FCC's rules, 47 CFR § 17.4.

Accordingly, your April 23, 2020, amendment to application file number BP-20200116AAB IS DENIED. Further action will be withheld for thirty (30) days from the date of this letter to allow time to initiate the airspace study. Failure to amend or respond within this time period will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's rules.

Sincerely,

Son Nguyen  
Supervisory Engineer  
Audio Division  
Media Bureau
