

Exhibit 12, Attachment B

REQUEST FOR WAIVER UNDER 47 CFR 74.1204(d)

This application for this translator location will request a waiver of the interference protection requirements of 74.1204 with regard to the requirement that this proposal and its associated interference contour would cause interference within the protected 60 dBu contour of the second-adjacent WQSU, Selinsgrove, PA. This waiver is allowable under the rules stated in 47 CFR 74.1204(d).

The rationale for such a waiver request is as follows:

1. WQSU, Selinsgrove, PA, a second adjacent channel facility to this translator proposal, is protected from interference within its 60 dBu contour from the associated interference contour (based on 47 CFR 74.1204(a)(1); using the FCC F(50/10) curves) which need be 40 dBu greater than the associated coverage contour (WQSU) that would encompass the proposed translator antenna site and that contour which is 40 dBu greater than the associated coverage contour.
2. This translator's antenna location is located within the 60 dBu contour (based on 73.333 F(50/50)) of WQSU, Selinsgrove, PA. This proposal will use the predicted desired to undesired
