K07AV, STANFORD, MONTANA

PAGE 1

Introduction

This engineering statement supports the application of the licensee of television translator station K07AV, Stanford, Montana (Facility ID 62226) for a digital construction permit due to its displacement from its currently licensed Channel 7 to the proposed Channel 11 because of the authorized post-transition digital television operation of KRTV-DT, Channel 7, Great Falls, Montana.

K07AV seeks displacement to a different channel due to the authorized Channel 7 construction permit for KRTV-DT (FCC File No. BMPCDT-20060706ADV) located 87 kilometers from the licensed K07AV transmitter site. K07AV hereby requests a construction permit for digital low-power television facilities to Channel 11 herein with an effective radiated power (“ERP”) of 0.3 kW (directional) at a radiation center above mean sea level (“RCAMSL”) of 1444.8 meters.

In addition to seeking this displacement relief, K07AV is correcting its operating coordinates and specifying a slightly different radiation center to accommodate a new antenna for its digital operation. Operation on Channel 11 will resolve any allocation uncertainties while improving the coverage due to this site correction.

There are two significant authorized full-service DTV stations within 265 km of the licensed K07AV site.

COHEN, DIPPELL AND EVERIST, P.C.

K07AV, STANFORD, MONTANA

PAGE 2

They are:

- KRTV-DT, Channel 7, Great Falls, Montana, within 87 km of the licensed K07AV site, FCC File No. BMPCDT-20060706ADV
- KFBB-DT, Channel 8, Great Falls, Montana, within 87 km of the licensed K07AV site, FCC File No. BLCDT-20071108ADA

Community of License

The geographic coordinates of the proposed transmitter site are as follows:

North Latitude: 47° 09' 59"

West Longitude: 110° 16' 30"

NAD-27

K07AV proposes operation of its digital low-power facilities on the same tower as currently licensed for its analog operation, however, it also requests correction of the licensed coordinates to those specified herein.

Technical Specifications

Antenna Location Site Elevation Above Mean Sea Level	1438.7 meters (4720 feet)
Height of Radiation Center Above Ground Level	6.1 meters (20 feet)
Overall Tower Height Above Ground Level	6.4 meters (21 feet)
Height of Radiation Center Above Mean Sea Level	1444.8 meters (4740 feet)
Maximum Effective Radiated Power	0.3 kW

COHEN, DIPPELL AND EVERIST, P.C.

K07AV, STANFORD, MONTANA

PAGE 3

Transmitter Output Power	0.067 kW
Out-of-Channel Emission Mask:	Simple

Antenna Type

Antenna: Two Kathrein Scala, Type CA2 (or equivalent) antennas with a directional power gain of 2.51 for each antenna (4.0 dB for each antenna) and 0.0° electrical beam tilt

As indicated above, the transmitter with typical power output of 0.067 kW will deliver 0.060 kW to the input of the antenna. The stacked antenna, having a maximum gain of 7.0 dB will produce a maximum ERP of 0.3 kW. A coverage map providing the licensed protected contour of K07AV at the corrected site in relation to the proposed protected contour for the digital facility has been included as Exhibit E-1 of this report.

Other Broadcast Facilities

A brief analysis was completed to determine the presence of stations in the vicinity of the proposed tower site using the October 6, 2008 data contained within the Commission's Consolidated Database System ("CDBS"). Within one kilometer of the proposed site, there are no authorized FM radio stations, no DTV stations, no NTSC television stations, no low-power analog television or television translator stations, and no low-power digital television or television translator authorizations other than the licensed K07AV operation, assuming operation from the correct site. There are no AM facilities within 3.22 km of the existing tower. Although no adverse technical effects are expected due to the proposed changes, the licensee will take

COHEN, DIPPELL AND EVERIST, P.C.

K07AV, STANFORD, MONTANA

PAGE 4

measures to resolve any problems proven to be related to the changes proposed in this application.

Allocation

The proposed digital operation on Channel 11 at Stanford, Montana, conforms to the requirements of Sections 74.703, 74.705, 74.706, 74.707, 74.708, 74.709, and 74.710 of the Commission's Rules. The requirements of these sections regarding this proposed Channel 11 operation of K07AV are met through demonstration of Longley-Rice prediction methodology where applicable, attached as Exhibits E-2a and E-2b. The proposed low-power television station will not cause any objectionable interference to any existing or proposed full-service NTSC or DTV station or LPTV/TV translators.

Interference Analysis

A study of predicted interference caused by the proposed K07AV low-power digital operation has been performed using the Longley-Rice program for which the source data has been posted by the Commission on its website at [http://www.fcc.gov/oet/dtv/dtv\\_apps.html](http://www.fcc.gov/oet/dtv/dtv_apps.html). The FCC's FORTRAN-77 code was modified only to the extent necessary (primarily input/output handling) for the program to run on a Microsoft Windows XP platform. Comparison of service/interference areas and population indicates this model closely matches the FCC's digital low-power TV/translator evaluation program. Best efforts have been made to use data and calculation identical to the FCC's program. The model employs the Longley-Rice propagation methodology and evaluates in grid cells of approximately 1 sq. km. Using 3-second terrain data sampled approximately every 1.0 km at one-degree azimuth intervals with 1990 census

COHEN, DIPPELL AND EVERIST, P.C.

K07AV, STANFORD, MONTANA

PAGE 5

centroids, all studies are based upon data in the current CDBS database update of the FCC's engineering database. A Longley-Rice study was performed with the proposed K07AV low-power digital facilities and all relevant stations listed in the FCC data base as of October 3, 2008. The study results and the included stations are listed in Exhibits E-2a and E-2b.

FCC Rule, Section 1.1307

The proposed 0.3 kW non-directional operation will utilize two Kathrein Scala, Type CA2 antennas (or equivalent) described above with a center of radiation above ground of 6.1 meters. The antenna will be side-mounted on an existing tower with an overall height of 6.4 meters above ground. Assuming a downward relative field of 0.5 (see Exhibit E-3), the proposed digital operation of K07AV on Channel 11 will create a radio frequency field level of less than  $132 \mu\text{W}/\text{cm}^2$  at 2 meters above the base of the tower. This level is less than 66% of the Maximum Permissible Exposure ("MPE") level for the general population and an uncontrolled environment, which is less than 13.2% of the MPE level for an occupational/controlled environment.

Authorized personnel and rigging contractors will be alerted to the potential zone of high radio frequency field levels on the tower, and if necessary, the station will operate with reduced power or terminate the operation of the transmitter as appropriate when it is necessary for authorized personnel or contractors to perform work on or near the tower. Workers and the general public, therefore, will not be subjected to RFF levels in excess of the current FCC guidelines.

COHEN, DIPPELL AND EVERIST, P.C.

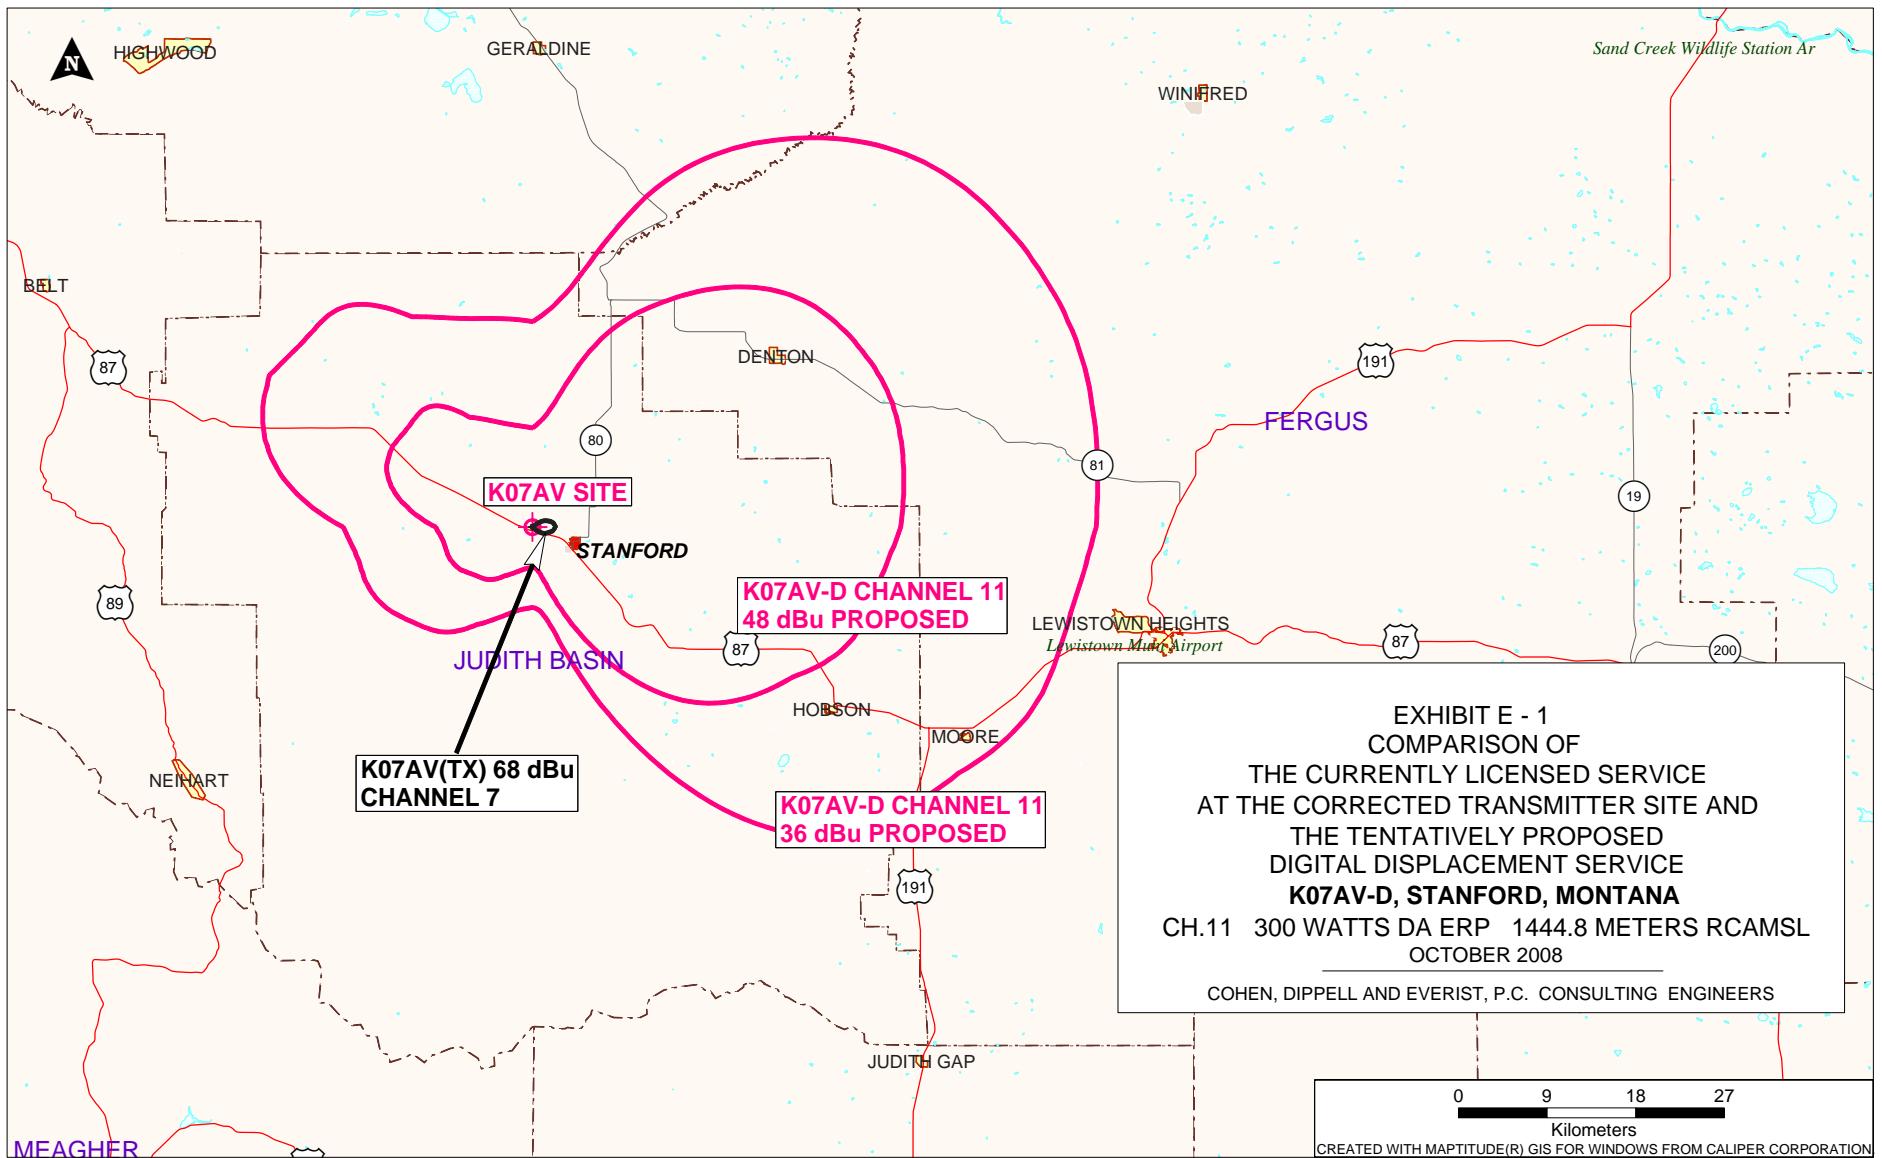

K07AV, STANFORD, MONTANA

PAGE 6

Environmental Assessment

An environmental assessment (“EA”) is categorically excluded under Section 1.1306 of the FCC Rules and Regulations as the tower was constructed prior to the requirements specified in WT Docket No. 03-128 and the applicant indicates:

- (a)(1) The existing tower is not located in an officially designated wilderness area.
- (a)(2) The existing tower is not located in an officially designated wildlife preserve.
- (a)(3) The proposed facilities will not affect any listed threatened or endangered species or habitats.
- (a)(3)(ii) The proposed facilities will not jeopardize the continued existence of any proposed endangered or threatened species or likely to result in the destruction or adverse modification of proposed critical habitats.
- (a)(4) The proposed facilities will be located on a tower which was built prior to the adoption of WT Docket No. 03-128 and will not affect any known districts, sites, buildings, structures, or objects significant in American history, architecture, archaeology, engineering, or culture.
- (a)(5) The existing tower is not located near any known Indian religious sites.
- (a)(6) The existing tower is not located in a flood plain.
- (a)(7) The installation of the DTV facilities on an existing tower will not involve a significant change in surface features of the ground in the vicinity of the tower.
- (a)(8) It is not proposed to equip the tower with high intensity white lights unless required by the FAA.
- (b) Workers and the general public will not be subjected to RFF levels in excess of the current FCC guidelines contained in OET Bulletin No. 65, Edition 97-01, dated August 1997 and Supplement A.

### Section III - Engineering (Digital)

#### TECHNICAL SPECIFICATIONS

Ensure that the specifications below are accurate. Contradicting data found elsewhere in this application will be disregarded. All items must be completed. The response "on file" is not acceptable.

#### TECH BOX

1. Channel: \_\_\_\_\_
2. Translator Input Channel No. \_\_\_\_\_
3. Station proposed to be rebroadcast:

Call Sign	City	State	Channel

4. Antenna Location Coordinates: (NAD 27)

o                         '                         "  
\_\_\_\_\_                     \_\_\_\_\_                     \_\_\_\_\_ N                      S Latitude  
o                             '                             "  
\_\_\_\_\_                     \_\_\_\_\_                     \_\_\_\_\_ E                      W Longitude

5. Antenna Structure Registration Number: \_\_\_\_\_

Not applicable

See Explanation  
in Exhibit No.

FAA Notification Filed with FAA

6. Antenna Location Site Elevation Above Mean Sea Level: \_\_\_\_\_ meters

7. Overall Tower Height Above Ground Level: \_\_\_\_\_ meters

8. Height of Radiation Center Above Ground Level: \_\_\_\_\_ meters

9. Maximum Effective Radiated Power (ERP): \_\_\_\_\_ kW

10. Transmitter Output Power: \_\_\_\_\_ kW

11. a. Transmitting Antenna:  Nondirectional  Directional  Directional composite

Manufacturer	Model

- b. Electrical Beam Tilt: \_\_\_\_\_ degrees  Not applicable

c. Directional Antenna Relative Field Values:

Rotation: \_\_\_\_\_ °       No rotation       N/A (Nondirectional)

Degree	Value	Degree	Value	Degree	Value	Degree	Value	Degree	Value	Degree	Value

Additional Azimuths											

**NOTE: In addition to the information called for in this section, an explanatory exhibit providing full particulars must be submitted for each question for which a "No" response is provided.**

12. **Out-of-Channel Emission Mask:**      Simple       Stringent

## CERTIFICATION

13. **Interference.** The proposed facility complies with all of the following applicable rule sections. 47 C.F.R. Sections 74.709, 74.793(e), 74.793(f), 74.793(g), 74.793(h), 74.794(b) and 73.1030.  Yes  No See Explanation in Exhibit No.
14. **Environmental Protection Act.** The proposed facility is excluded from environmental processing under 47 C.F.R. Section 1.1306 (*i.e.*, the facility will not have a significant environmental impact and complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments). Unless the applicant can determine RF compliance. An **Exhibit is required.**  Yes  No See Explanation in Exhibit No.

By checking "Yes" above, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.

15. **Channels 52-59.** If the proposed channel is within channels 52-59, the applicant certifies compliance with the following requirements, as applicable:

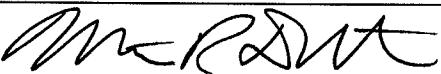

- The applicant is applying for a digital companion channel for which no suitable channel from channel 2-51 is available.
- Pursuant to Section 74.786(d), the applicant has notified, within 30 days of filing this application, all commercial wireless licensees of the spectrum comprising the proposed TV channel and the first adjacent channels thereto, for which the proposed digital LPTV or TV translator antenna site lies inside the licensed geographic boundaries of the wireless licensees or within 75 miles and 50 miles, respectively, of the geographic boundaries of co-channel and adjacent-channel wireless licensees.

**PREPARER'S CERTIFICATION ON PAGE 8 MUST BE COMPLETED AND SIGNED.**

16. **Channels 60-69.** If the proposed channel is within channels 60-69, the applicant certifies compliance with the following requirements, as applicable:

- Pursuant to Section 74.786(e), the applicant has notified, within 30 days of filing this application, all commercial wireless licensees of the spectrum comprising the proposed TV channel and the first adjacent channels thereto, for which the proposed digital LPTV or TV translator antenna site lies inside the licensed geographic boundaries of the wireless licensees or within 75 miles and 50 miles, respectively, of the geographic boundaries of co-channel and adjacent-channel wireless licensees,
- Pursuant to Section 74.786(e), the applicant proposing operation on channel 63, 64, 68 and 69 ("public safety channels") has secured a coordinated spectrum use agreement(s) with 700 MHz public safety regional planning committee(s) and state frequency administrator(s) of the region(s) and state(s) within which the antenna site of the digital LPTV or TV translator station is proposed to locate, and those adjoining regions and states with boundaries within 75 miles of the proposed station location.
- Pursuant to Section 74.786(e), an applicant for a channel adjacent to channel 63, 64, 68 or 69 has notified, within 30 days of filing this application, the 700 MHz public safety regional planning committee(s) and state administrator(s) of the region and state containing the proposed digital LPTV or TV translator antenna site and regions and states whose geographic boundaries lie within 50 miles of the proposed LPTV or TV translator antenna site.

I certify that I have prepared Section III (Engineering Data) on behalf of the applicant, and that after such preparation, I have examined and found it to be accurate and true to the best of my knowledge and belief.
