

Dave Brawdy,
Chief Telecommunications Engineer
Washington State University
KNWV Pullman, WA

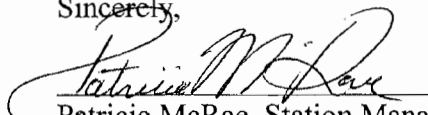

Dear, Mr. Brawdy

Having reviewed the information you supplied to KHQ on 8/13/2007 it appears that any potential interference to KHQ-TV from the proposed changes to KNWV -FM located near Clarkston, WA at Lat: N46:27:26 Lon: W117:06:00 NAD-27 operating on Channel 213 (90.5Mhz) with an Effective Radiated power of 420 watts should be minimal. However, since the possibility does exist KHQ will ask that KNWV agree to comply with the following conditions.

1. KNWV will remedy interference to KHQ channel 6 users by providing a suitable notch filter to each viewer, complaining of interference from KNWV, to remove the interfering signal.
2. KNWV will provide KHQ with the phone number and email address of the responsible person to contact if KHQ should receive any complaints from viewers of interference to KHQ channel 6.
3. KNWV will provide KHQ with a copy of any reception complaints that it receives and a description of the corrective action taken.
4. This letter of agreement applies only to KNWV's current application. Any future changes in operating parameters of KNWV will require renewed consent from KHQ.

Please return a signed copy of this letter as your understanding and acceptance of its conditions.

Sincerely,

Patricia McRae, Station Manager

Agreed to:

Signed: 
Dave Brawdy, Chief Engineer
