

Compliance with International Requirements

The proposed FM translator is located approximately 39.5km from the Canadian border. FLM has included the attached map (see Exhibit 12A) to show the 34dBu interfering contour of the proposed translator extends beyond the Canadian border and extends over Canadian Soil. Note the 34dbu interfering contour does not extend beyond 60km over Canadian Soil as seen in Exhibit 12B, distance to contour report. The radials that extend over Canadian Soil, the 340 to zero degree azimuths, extend to distances less than 60km.

FLM respectfully requests a waiver of CFR 47.1235(d)(3) due to the fact that the 34dbu(F50-10) contour does not extend further than 60km over Canadian Soil.
