

Three Angels Broadcasting Network  
 Dan Peek—Engineer  
 P.O. Box 220  
 West Frankfort, Illinois 62896

August 24, 2011

In evaluating the proposed minor modification application for K52EG, Yuma, AZ FID 5014 an outgoing interference study was executed at the tower location using the proposed parameters as outlined in the application. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference using the OET-69 Longley Rice methodology, the interference, when rounded to the nearest whole percent, was found to be zero percent interference.

Since K52EG operates on channel 52 and must be moved by the end of 2011, Three Angels Broadcasting Network requests that the Commission kindly requests expedited service and an explanation from International Coordination if this application is rejected by them.
