

EXHIBIT A

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of EQUITY BROADCASTING CORPORATION, licensee of Low Power Television Station WJMF-LP, Channel 53 in Jackson, Mississippi, in support of this Application for Construction Permit to operate on Channel 19 from the licensed site. Due to the FCC's reallocation of Channel 53 spectrum for auction, WJMF-LP is being displaced and seeks operation on Channel 19 with the facility described herein.

It is proposed to mount a standard SWR directional antenna at the 305-meter level of an existing 336-meter communications tower. Exhibit B is a map upon which the predicted service contours are plotted. Since no change in site is proposed herein, the newly proposed 74 dBu contour necessarily encompasses a significant portion of that which obtains from the licensed facility. Therefore, the changes proposed herein, as well as the fact that this is a displacement application, constitute a "minor" change in facilities. Operating parameters for the proposed facility are tabulated in Exhibit C. A contour overlap analysis and interference study are provided in Exhibit D, and a power density calculation follows as Exhibit E.

Because no change in the overall height or location of the existing tower is proposed, the FAA has not been notified of this application. The FCC issued Antenna Structure Registration Number for this tower is 1037895.

EXHIBIT A

I declare under penalty of perjury that the foregoing statements and the attached exhibits, which were prepared by me or under my immediate supervision, are true and correct to the best of my knowledge and belief.
