Charles M. Anderson
Anderson Associates
1519 Euclid Avenue
Bowling Green, KY 42103

Ref: W250BW and W267BM

Dear Mr. Anderson,

We anticipate no adverse effects to the directional pattern of the W250BW antenna from the 7/8" coaxial transmission line which is used to feed the W267BM antenna and that passes through the aperture of the W250BW antenna.

If you have any additional questions please don't hesitate to call.

Sincerely,

Douglas A. Ross
President
