Re: WYCS (FM), Yorktown, Virginia  
Facility Identification Number: 66672  
Creative Educational Media Corporation, Inc.  
Special Temporary Authorization

Dear Counsel:

This is in reference to the request filed January 27, 2010, and supplemented on March 4, 2010, on behalf of Creative Educational Media Corporation, Inc. ("CEMC"). CEMC requests further extension of the special temporary authority ("STA") granted on March 9, 2005, to operate Station WYCS with auxiliary facilities.<sup>1</sup> In support of the request, CEMC states that it has lost the site specified in Construction Permit BMPED-20091222ALV; however, it has located a new site and plans to file an application for a new construction permit.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that Application BPED-20100309AAR is pending; thus, the licensee has made substantial progress toward restoring licensed operation.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WYCS may continue to operate with the following facilities (as authorized in BXLED-20050303AAQ):

---

<sup>1</sup> WYCS is licensed for operation on Channel 218B1 (91.5 MHz) with effective radiated power of 1.3 kilowatts (H), 20 kilowatts (V) and antenna heights above average terrain of 113 meters (H) and 101 meters (V).

Geographic coordinates: 37° 04' 41" N, 76° 26' 47" W (NAD 1927)  
Channel 218 (91.5 MHz)  
Effective radiated power: 4 kilowatts (V only)  
Antenna height:  
    above ground: 78 meters  
    above mean sea level: 87 meters  
    Above average terrain: 87 meters

CEMC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 17, 2010**.

Sincerely,

A handwritten signature in blue ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
