

**Exhibit E-22**

KISD(FM) currently operates on channel 254C. The proposed facility would continue to operate as a class C facility on the same channel. This application seeks merely to increase the center of radiation of the existing facility such that it would comply with the minimum center of radiation above average terrain for a class C facility. As a result, the proposed facility would be in compliance with the provisions of Section 73.203 of the Commission's Rules.
