In re: NEW(FM), Donna, TX
BNPFT-20130328ADZ
Facility ID No. 138169

Dear Applicant:

This letter refers to the above-captioned application for a new FM translator station in Donna, Texas.

An engineering review of the application reveals that the proposal violates Sections 2.1.1 of the Agreement Between the Government of the United States of America and the Government of the United Mexican States Relating to the FM Broadcasting Service in the Band 88-108 MHz.

Section 2.1.1 requires that the proposed 100 dBμ interfering contour cannot overlap with the 60 dBμ protected contour of Mexican FM allotments and assignments. The proposed translator is approximately 27.8 kilometers from a Mexican Class AA allotment in Reynosa, Mexico, on Channel 237. The Mexican protected contour extends 28 kilometers, therefore the interfering contour of the proposed facility overlaps with the protected contour of the Mexican allotment.

Accordingly, Application BNPFT-20130328ADZ IS HEREBY DISMISSED. This action is taken pursuant to 47 C.F.R. § 0.283.

Sincerely,

James D. Bradshaw
Deputy Chief
